

Case study-local area: Homework due in 2nd February.

Complete at least 2 of these activities (yes, you may do all of them if you would like). Housepoints and raffle tickets will be awarded for effort!

1. Find out three interesting or strange facts about your local area.
2. How long have you lived there? Interview someone who has lived there a lot longer than you (e.g. granddad, neighbour)- how has the area changed?
3. Pick a public building in your local area- tell me about the history of this building as well as the present uses.
4. Draw a map of the local area- you will need to take a walk around it first (with an adult)! Can you use a grid?
5. Where are the public services in your local area? (e.g. hospital, police station, fire station, library). Can you locate them on your map and say how far away from each other they are?

It is up to you if you wish to add any more information about your local area. Is there any interesting local history? What other villages/towns are nearby? It is up to you! You could add pictures to your project. **IT may be used but isn't essential.** You may be asked to present this to the class- be prepared!
