

This week in Year 6 we have been ordering and comparing fractions, decimals and percentages (as well as finding percentages of amounts).

We have also been writing a non-fiction report about NASA in our English lessons, focusing on using a formal tone and accurate paragraphs.

We have also visited Harrietsham Primary school on Thursday for a production of 'Wasted'. The performance provoked a lot of discussion in class, which has been informative and illuminating for the children.

In the afternoons, the class have been improving their map skills by making their own compasses and learning about 6 figure grid references.

Next week we are looking forward to:

- Our termly library visit (Tuesday 9.15- if you are able to help please let the office know).
- Revising long division and long multiplication.
- Writing a biography.

### Homework

Homework this week is a maths worksheet involving percentages of amounts. For SPAG, there is a worksheet involving the subjunctive and perfect tense.

Spellings lists are available on the website and children have had copies sent home.

It is expected that all children know their times tables up to 12x12 by now. Testing is carried out every Wednesday.

Thank you for your support with this. If your child is unable to complete the homework for whatever reason, please let me know via a letter. Internet access is available at school for those who do not have it at home.
