

This week we have:

- Written scripts and performed them as puppet shows.
- Played a variety of squash games in PE.
- Used division and multiplication methods in Maths.
- Discovered, observed and measured a full size skeleton.

Looking ahead to next term our topic will be the Ancient Egyptians. Our English work will involve writing stories, instructions and Newspapers. In Maths we will be learning about measurement and fractions. Although we will be moving away from the addition, subtraction, multiplication and division areas of Maths they will remain a focus, particularly in homework so that we continue to use the correct methods and practice our times tables. Finally in science we will be looking at magnets and forces.

Next term we will be going for a short run in the afternoon's 3 times a week. At first this will be on the playground and then once the weather becomes warmer it will be on the field.

There is no homework for the half term. Please ensure your child is reading regularly at home, practicing times tables on the Times Table Rock Stars website/app and having a fun break.

The Year 3 Teaching Team.
