

Dear Parents,

It has been nice to get back to normality this week after the excitement of the snow days and the water day!

We have caught up with our maths and finished the Shape block. Now we have begun fractions. Next week we will be learning how to work out fractions of number and fractions of shapes. We will be starting with half, quarters and thirds.

In English this week we followed up the fantastic performance of Alice in Wonderland that we watched on Tuesday. We created a story map together, practiced telling the story then used the map to write the story on Friday!

Next week is Science Week in school.

The homework is based on this and there is a brightly coloured pencil for each child who returns their homework!

In school, each class is choosing a superhero to base their science around during the week. We are using Wonder Woman! Rather nicely, Wonder Woman fits in with Mother's Day, and she has a lot of similarities with Malala. They both defend the weak, speak up for injustice and believe in love, peace and equality of the sexes! Naturally I'll be drawing the children's attention to this during the week!

Have a lovely Mother's Day mums!
Mrs Martin
