

This week in Year 6 we have revised long division, looking at a variety of different ways to solve problems using written methods of division. We have written thank you letters to Howletts zoo for our visit last week, as well as planning and writing persuasive letters to the government regarding the conservation of animals.

Next week we are looking forward to:

- Writing a non-fiction informative leaflet.
- Meeting a new character 'Mina' in 'Skellig'.
- Identifying multiples, factors, prime and squared numbers.
- Using apostrophes correctly for contraction and possession.
- Starting to use BIDMAS for the order of operations.

Homework

The children have a worksheet about long division- they may use whatever method they like and check their answers on a calculator if they wish. There is also a sheet about prepositions and prepositional phrases.

N.B. Rev Huggins is leading a Harvest assembly on Monday 1st Oct.
