

This week in Year 6 we have looked at mathematical relationships between numbers e.g. prime, squared and cubed numbers. We also started to use BIDMAS when calculating with more than one operation. In English lessons, we analysed the character of Mina and made links between the language Almond uses and the themes we have identified so far.

Next week we are looking forward to:

- Revising our knowledge of Roman numerals.
- Calculating answers to multi-step maths problems.
- Carrying out our heart dissection as we start our new science topic.
- Our termly library trip.

Homework

The children have a worksheet about BIDMAS and a worksheet about identifying the subject, object and verb in sentences. Homework club is available on Monday at lunchtime.

The Year 6 team
