

This week in Year 6 we have studied Roman numerals in our maths lessons, as well as revising multi-step problems. We have looked at using brackets, dashes and commas to demarcate parenthesis in English lessons, and we visited the library on Tuesday. Of course, the highlight of the week was the heart dissection! The children have learned all about the chambers of the heart and how blood travels around the body as part of our new science topic 'The Circulatory system'. The children have also attended Bikeability sessions all week and did very well learning to cycle safely on the roads!

A big well done to all of the children who received their 11+ results this week- we are very proud of their efforts, no matter the result!

Next week we are looking forward to:

- Learning about defibrillator use and how to save a life with an AED.
- Revising key mathematical concepts from this term, including rounding and long division.
- Sending our letters to South Africa!
- Recognising and using possessive pronouns.

### Homework

The children have a worksheet about Roman numerals, as well as a task about synonyms and antonyms. Homework club is available on Monday at lunchtime.

REMINDER: our next library trip is in term 2. Please ensure that your child is registered with Kent Libraries before then so that they can borrow books. Thank you for your support with this.
