

This week in Year 6 we have learned about our circulatory system and electricity in science as part of our topic 'The Buzz of Life'. We have studied 'Skellig' in our English lessons, which we have used to identify themes and symbolism within a text. In maths, we have completed our topics of place value and the four operations. In PE, we have had fun during our 'Ball Skills' topic and developed teamwork skills as part of our OAA module.

Next term we are looking forward to:

- Our new history topic 'Changing the Monarchy', focusing on turning points of history such as 1066, the Magna Carta, the abdication crisis and the British Empire.
- Moving onto fractions in our maths lessons.
- Starting dance as a PE module, assisted by Mrs Cavanaugh from the Lenham School.

Homework

The children have **optional** half term homework about Black History Month. The entries can be submitted to the library or through the school. The children should relax after a challenging first term- they have done really well to settle into Year 6 and deserve a break! There have been tests set on spag.com and Timestables Rockstars if the children really want to revise but again, this is optional.

The Year 6 team
