

Science challenge

Next week is our whole school science week. Each class will be given a science based task to carry out at home in preparation for a display which will be held in the hall.

Rainbow Class challenge

Can you go on a mini beast hunt around your garden or in the park?

Look carefully in the grass, on the plants, under stones, on the fence, on the bark of the trees and in the bushes. What did you find? Where did you find them? How many different creatures did you find? What colour, size or shape are they? Do they have wings? How many legs do they have?

We would love to see what you found.

You can choose to do this in lots of different ways. Maybe you could make a poster (we have sent home a sheet of paper if you need it) or take some photographs or draw some pictures or even make a model of one of the creatures that you found.

Maybe you could find out a fact about one of them or write some labels around your pictures and add these to your poster?

All your fantastic work will be put on display for everyone to enjoy and there will be a prize for the best science learning.

Have FUN hunting those Eeny Meeny Mini beasts!!
