

Dear Parents,

We had some fantastic writing this week after the excitement of Science Week! We spent some time carefully planning what we'd done/seen/learnt and suggested adjectives and adverbs we could include, then by Weds we were ready to draw it all together in a longer piece of writing.

We have done a couple of maths assessments this week in Arithmetic and Reasoning. The results are really encouraging and have highlighted areas to focus on as we move forward. The homework you have all been completing has really supported the children with their working out skills and this has definitely contributed to the progress they are making. Thank you for all your support at home.

Our science topic is still going strong and this week we investigated what happens to different materials when they are squashed, bent, twisted or stretched. Then from this we worked out the property of the materials. The children are really enjoying science and have amassed some terrific vocabulary this term.

Next week, we will be starting our Measurement maths unit, and focusing on reading comprehension in English.

Have a lovely weekend,

Mrs Martin
