Year 3 Maths Curriculum

| Autumn | Number: Place Value <br> Identify, represent and estimate numbers using different representations <br> Find 10 or 100 more or less than a given number. <br> Recognise the pace value of each digitin a three-digit number (hundreds, tens, ones) <br> Compare and order numbers up to 1000. <br> Read and write numbers up to 1000 in numerals and words. <br> Solve number problems and practical problems involving these ideas. <br> Count from 0 in multiples of $4,8,50$ and 100 <br> Number: Addition and Subtraction <br> Add and subtract numbers mentally, including: a three-digit number and ones; a three-digit number and tens; a three digit number and hundreds. <br> Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction. <br> Estimate the answer to a calculation and use inverse operations to check answers. <br> Solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. <br> Number: Multiplication and Division <br> Count from 0 in multiples of $4,8,50$ and 100 <br> Recall and use multiplication and division facts for the 3,4 and 8 times tables, <br> Write and calculate mathematical statements for multiplication and division using the multiplication tables they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods. <br> Solve problems, including missing number problems, involving multiplication and divisions, including positive integer scaling problems and correspondence problems in which $n$ objects are connected to $m$ objects. |
| :---: | :---: |
| Spring | Number: Multiplication and Division <br> Recall and use multiplication and division facts for the 3, 4 and 8 times tables. <br> Write and calculate mathematical statements for multiplication and division using the multiplication tables they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods. <br> Solve problems, including missing number problems, involving multiplication and divisions, including positive integer scaling problems and correspondence problems in which $n$ objects areconnected to $m$ objects. <br> Measurement: Money <br> Add and subtract amounts of money to give change, using both $£$ and $p$ in practical context. <br> Statistics <br> Interpret and present data using bar charts, pictograms and tables <br> Solve one-step and two-step questions (for example, 'How many more?' and 'How many fewer?') using information presented in scaled bar charts and pictograms and tables. |

Measure, compare, add and subtract: lengths ( $\mathrm{m} / \mathrm{cm} / \mathrm{mm}$ ); mass ( $\mathrm{kg} / \mathrm{g}$ ); volume/capacity ( $\mathrm{I} / \mathrm{ml}$ )
Measure the perimeter of simple 2-D shape

## Number: Fractions

Count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10.

Recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators
Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators.
Solve problems that involveall of above.

## Number: fractions

Recognise and show, using diagrams, equivalent fractions with small denominators.
Compare and order unit fractions, and fractions with the samedenominators.
Add and subtract fractions with the same denominator within one whole (for example $5 / 7+1 / 7=6 / 7$
Solve problems that involve all of the above.

## Measurement : Time

Tell and write the time from an analogue clock, including using Roman numerals from I to XII and 12-hour and 24-hour clocks.
Estimate and read time with increasing accuracy to the nearest minute.
Record and compare time in terms of seconds, minutes and hours.
Use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight.
Summer
Know the number of seconds in a minute and the number of days in each month, year and leap year.
Compare durations of events (for example to calculate the time taken by particular events or tasks).

## Geometry : properties of shape

Recognise angles as a property of shape or a description of a turn
Identify right angles, recognise that two rightangles make a half-turn, three make a three quarters of a turn and four a complete turn; identify whether angles aregreater than or less than a right angle.
Identify horizontal and vertical lines and pairs of perpendicular and parallel lines.
Draw 2-D shapes and make 3-D shapes suing modelling materials.
Recognise 3-D shapes in different orientations and describe them.

## Measurement : Mass and Capacity

Measure, compare, add and subtract: lengths ( $\mathrm{m} / \mathrm{cm} / \mathrm{mm}$ ); mass ( $\mathrm{kg} / \mathrm{g}$ ); volume/capacity ( $1 / \mathrm{ml}$ )
