Year 2 Maths Curriculum

## Number: Place Value

Read and write numbers to at least 100 in numerals in words.
Recognise the place value of each digit in a two digit number (tens, ones)
Identify, represent and estimate numbers using different repres entation including the number line.
Compare and order numbers from 0 up to 100 ; use $<,>$ and $=$ signs
Use place valeand number facts to solve problems
Count in steps of 2, 3 and 5 from 0 , and in tens from any number, forward and backward.

## Number : Addition and Subtraction

Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100.
Add and subtract numbers using concrete objects, pictorial representations, and mentally, including: a twoOdigit number and ones; a two-digit number and tens; two two-digit numbers; adding three one-digit numbers.
Show that the addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot.
Solve problems with addition and subtraction: using concrete objects pictorial representations, including those involving numbers, quantities and
Autumn measures; applying their increasing knowledge of mental and written methods.
Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.

## Measurement : Money

Recognise and use symbols for pounds ( $£$ ) and pence (p); combine amounts to make a particularvalue.
Find different combinations of coins that equal the same amounts of money.
Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change.

## Number: Mulitplication and Division

Recall and use multiplication and division facts for the 2,5 and 10 times ta bles, including recognising odd and even numbers.
Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication ( x ), division $(\div)$ and equals (=) sign
Solve problems involving multiplication and division using materials, arrays, repeated addition, mental methods and multiplication and division facts, including problems in contexts.
Show that the multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot.

## Number: Multiplication and Divsion

Recall and use multiplication and division facts for the 2,5 and 10 times tables, including recognising odd and even numbers.
Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (x), division $(\div)$ and equals (=) sign
Spring
Solve problems involving multiplication and division using materials, arrays, repeated addition, mental methods and multiplic ation and division facts, including problems in contexts.
Show that the multiplication of two numbers can be done in any order (commutative) and division of one number by another cann ot.

Interpret and construct simple pictograms, tally charts, block dia grams and simple tables.
Ask and answer simplequestions by counting the number of objects in each category and sorting the categories by quantity. Ask and answer questions about totalling and comparing categorical data

## Geometry : Properties of Shape

Identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line.
Identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces.
Identify 2-D shapes on the surface of a 3-D shape, (for example, a circle on a cylinder and a triangle on a pyramid)
Compare and sort common 2-D and 3-D shapes and everyday objects

## Number: Fractions

Recognise, find, name and write fractions $1 / 3,1 / 4,{ }^{2} / 4$, and $3 / 4$ of a length, set of objects or quantity.
Write simple fractions for example $1 / 2$ of $6=3$ and recognise ${ }^{2} / 4$, and $1 / 2$.

## Measurement : Length and Height

Choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature ( ${ }^{\circ} \mathrm{C}$ ); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales thermometers and measuring vessels.
Compare and order lengths, mass, volume/capacity and record the results using <, > and =

## Position and Direction

Use mathematical vocabulary to describe position, direction and movement including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise)
Order and arrange combination of mathematical objects in patterns and sequences.

## Measurement : Time

Tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to chow these times
Know the number of minutes in an hour and the number of hours in a day.
Compare and sequence intervals of time.
Summer

## Measurement : Mass, Capacity and Temperature

Choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature ( ${ }^{\circ} \mathrm{C}$ ); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessel s
Compare and order lengths, mass, volume/capacity and record the results using $<,>$ and $=$

## Problem Solving and Efficient Methods
