Risk assessment blank form - 5 steps

Step 1 What are the hazards?	Step 2 Who might be harmed and how?	Step 3 What are you already doing?	Risk rating	Step 4 Is anything further needed?	Step 5 Action & review
 Spot hazards by: walking around your workplace asking those doing the task what they think checking manufacturers' instructions considering health hazards 	Identify groups of people, consider: employees temporary / agency staff contractors volunteers members of the public children (including work experience) lone workers pupils service users	List what is already in place to reduce the likelihood of harm or make any harm less serious, examples include: - guarding - training - procedures, safe systems of work - personal protective equipment (PPE)	Trivial, low, medium, high or stop (please see matrix below)	You need to make sure that you have reduced risks 'so far as is reasonably practicable'. An easy way of doing this is to compare what you are already doing with good practice. If there is a difference, list what needs to be done.	Remember to prioritise Deal with those hazards that are high-risk and have serious consequences first. List: actions required who needs to do them by when check actions completed

Risk rating									
	Slightly harmful	Harmful	Extremely harmful						
Highly unlikely	Trivial risk	Low risk	Medium risk						
Unlikely	Low risk	Medium risk	High risk						
Likely	Medium risk	High risk	STOP						
Risk level		Action and timescale							
Trivial	No action required and no docu	No action required and no documentary record needs to be kept.							
Low	No additional physical control maintained.	neasures are required, however monito	oring is necessary to ensure that the controls are						
Medium	the medium risk is associated w	Efforts should be made to reduce the risk and the reduction measures should be implemented within a defined period. Where the medium risk is associated with extremely harmful consequences, further assessment may be necessary to establish more precisely the likelihood of harm as a basis for determining the need for improved control measures.							
High		Work should not be started until the risk has been reduced to an acceptable level. Considerable resources may be allocated to reduce the risk. Where the risk involves work in progress, urgent action should be taken.							
Stop	Work should not be started or c		ed. If it is not possible to reduce risk even with unlimited

Follow the systems of Prevention.	Staff and children	 Minimise contact with individuals who are unwell by ensuring that those who have coronavirus (COVID-19) symptoms, or who have someone in their household who does, do not attend school. Where recommended, use of face coverings in schools Clean hands thoroughly more often than usual Ensure good respiratory hygiene by promoting the 'catch it, bin it, kill it' approach. Introduce enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents. Minimise contact between individuals and maintain social distancing wherever possible. Where necessary, wear appropriate personal protective equipment (PPE) 	Low/medium		Staff to be given RA and to sign working conditions.	НТ	4/1/21	

		Always keeping occupied spaces well ventilated				
Respond to infection	Staff and children	Engage with the NHS Test and Trace process Manage confirmed cases of COVID-19 amongst the school community Contain any outbreak by following local health protection team advice	Low/medium	Staff to be given RA and to sign working conditions.	НТ	4/1/21
Dealing with children/staff showing symptoms	Staff and children	1. Minimise contact with individuals who are unwell by ensuring that those who have COVID-19 symptoms, or who have someone in their household who does, do not attend school Ensuring that pupils, staff and other adults do not come into school if they have COVID-19 symptoms, or have tested positive in the last 10 days, and ensuring anyone developing those symptoms during the day is sent home, are essential actions to reduce the risk in school and further drive down transmission of COVID-19. All schools must follow this process and ensure all staff are aware of it. If anyone in school becomes unwell with a new and persistent cough or high temperature, or has a loss of or change in, their normal sense of taste or smell, they must be sent home and advised to follow 'stay at home' guidance for households with possible or confirmed COVID-19 infection	Low/medium	Staff to be given RA and to sign working conditions.	НТ	4/1/21

guidance for households with possible or
confirmed coronavirus (COVID-19) infection
This sets out that they must self-isolate for at
least 10 days and should arrange to have a test
to see if they have COVID-19.
Other members of their household (including any
siblings) should self-isolate for 10 days from the
day after the individual tested positive
day after the marriada tested positive
If a child is awaiting collection, they should be
moved, if possible, to the Isolation Room. Ideally,
the door should be closed, depending on the age
and needs of the child with appropriate adult
supervision. Ideally, a window should be opened
for ventilation.
If they need to go to the bathroom while waiting to
be collected they should use the toilet within the
Isolation Room area. The bathroom must be
cleaned and disinfected using standard cleaning
products.
PPE must be worn by staff caring for the child
while they await collection if a distance of 2
metres cannot be maintained. More information
can be found in the following guidance

Washing hands	Staff and children	COVID-19 is an easy virus to kill when it is on				
regularly		skin. This can be done with soap and running water or hand sanitiser. School must ensure that pupils clean their hands regularly, including when they arrive at school, when they return from breaks, when they change rooms and before and after eating. Regular and thorough hand cleaning is going to be needed for the foreseeable future. As a school we must consider and implement the following points: • Every classroom has hand santisier. • Supervision of hand sanitiser use given risks around ingestion. Small children and pupils with complex needs should continue to be helped to clean their hands properly. Skin friendly cleaning wipes can be used as an alternative. • Building these routines into school culture, supported by behaviour expectations and helping ensure younger children and those with complex needs understand the need to follow them. • A timetable has been generated telling staff when to wash hands.	Low/medium	Staff to be given RA and to sign working conditions.	HT	4/1/21
Ensure good	Staff and children	The 'catch it, bin it, kill it' approach continues to				
respiratory hygiene by promoting 'catch it, bin it, kill it' approach		be very important, so we must ensure that we have enough tissues and bins available in the school to support pupils and staff to follow this routine. As with hand cleaning, schools must ensure younger children and those with complex needs are helped to get this right, and all pupils	Low/medium	Staff to be given RA and to sign working conditions. distancing wherever		how to implement this. School must do everything		given RA and		
possible		possible to minimise contacts and mixing while		to sign working		
		delivering a broad and balanced curriculum.		conditions.		

The overarching principle to apply is reducing the number of contacts between staff and pupils. This can be achieved through keeping groups separate (in 'bubbles') and through maintaining distance between individuals. These are not alternative options and both measures will help, but the balance between them will change depending on: Children's ability to distance The layout of the school • The feasibility of keeping distinct groups separate while offering a broad curriculum It is likely that for younger children the emphasis will be on separating groups. For children old enough, they should also be supported to maintain distance and not touch staff where possible. The points to consider and implement are set out in the following sections: a. How to group children Children and staff are placed in bubbles, these bubbles do not mix with other bubbles. Toilet for bubbles are allocated. b. Measures within the classroom Maintaining a distance between people whilst inside and reducing the amount of time they are in face to face contact lowers the risk of transmission. Ideally, adults should maintain 2 metre distance from each other, and from children. We know that this is not always

		d. Measures for arriving at and leaving school We have 2 enterance for arriving to school. Parent wearing masks may enter the playground,				
		socially distanced to drop off Year R-2 children. Year 3-6 children walk independently up the drive to enter school.				
		Collection is using the same areas but all parents must wear masks and collect children from different socially distanced areas.

<u> </u>	_	_	
Schools must ensure that staff members and			
parents/carers understand that they will need to			
be ready and willing to:			
a. Book a test			
(www.gov.uk/guidance/coronavir			
us-covid-19-getting-tested) if			
they or their child are displaying			
symptoms. The main symptoms			
are a high temperature, a new			
continuous cough and/or a loss			
or change to your sense of smell			
or taste. Staff and pupils must			
not come into the school if they			
have symptoms, and must be			
sent home to self-isolate if they			
develop them in school. All			
children can be tested, including			
children under 5, but children			
aged 11 and under will need to			
be helped by their parents/carers			
if using a home test kit.			
b. Provide details of anyone they			
have been in close contact with if			
they were to test positive for			
COVID-19 or if asked by NHS			
Test and Trace to self-isolate			
(www.gov.uk/government/publica			
tions/covid-19-stay-at-home-			
guidance/stay-at-home-			
guidance-for-households-with-			
possible-coronavirus-covid-19-			
infection) if they have been in			
close contact with someone who			
develops coronavirus symptoms			
or someone who tests positive			
for COVID-19			
101 00 101-19		L	

c. Self isolate if they have been in	
close contact with someone who	
tests positive for COVID-19, or if	
anyone in their household	
develops symptoms of COVID-19	
Anyone who displays symptoms of COVID-19	
can and should get a test. Tests can be booked	
online through the NHS testing and tracing for	
coronavirus website,	
www.nhs.uk/conditions/coronavirus-covid-	
19/testing-for-coronavirus or ordered by	
telephone via NHS 119 for those without access	
to the internet. Essential workers, which includes	
anyone involved in education or childcare, have	
priority access to testing.	
Schools should ask parents/carers to inform them	
immediately of the results of a test:	
If someone with symptoms tests negative for coronavirus (COVID-19), then they should stay at	
home until they are recovered as usual form their	
illness but can safely return thereafter. The only	
exception to return following a negative test result is	
where an individual is separately identified as a close contact of a confirmed case, when they will need to	
self-isolate for 10 days from the date of that contact.	
If someone with symptoms test positive, they should follow the guidance	
(www.gov.uk/government/publications/covid-19-stay-	
at-home-guidance) and must continue to self-isolate	
for at least 10 days from the onset of their symptoms	
and then return to school only if they do not have symptoms other than cough or loss of sense	
smell/taste. This is because a cough or anosmia can	
last for several weeks once the infection has gone.	
The 10-day period starts from the day when they first became ill. If they still have a high temperature, they	
should keep self-isolating until their temperature	
returns to normal. Other members if their household	

		should continue self-isolating for the full 10 days from the day after the individual tested positive.				
Manage confirmed cases of COVID-19 amongst the school community	Staff and children	Schools must take swift action when they become aware that someone who has attended has tested positive for COVID-19. Schools can contact the dedicated advice service introduced by Public Health England (PHE) and delivered by the NHS Business Services Authority. This can be reached by calling the DfE Helpline on 0800 046 8687 and selecting option 1 for advice on the action to take in response to a positive case. The advice service will carry out a rapid risk assessment to confirm who has been in close contact with the person during the period that they were infectious, and ensure they are asked to self-isolate. If, following triage, further expert advice is required the advisor will escalate the school's call to the PHE local health protection team. The advice service (or PHE local health protection team if escalated) will work with schools in this situation to guide them through the actions they need to take. Based on the advice from the health protection team, schools must send home those people who have been in close contact with the person who has tested positive, advising them to self-isolate for 10 days from the day after contact with the individual tested positive. Close contact means:	Low/medium	Staff to be given RA and to sign working conditions.	HT	4/1/21

		 Direct close contact – face to face contact with an infected individual for any length of time, within 1 metre, including being coughed on, a face to face conversation, or unprotected physical contact (skin-to-skin) Proximity contacts – extended close contact (within 1 or 2 metres for more than 15 minutes) with an infected individual. Travelling in a small vehicle, like a car, with an infected person. The advice service (or PHE local health team if escalated) will provide definitive advice on who must be sent home. To support them in doing so, it is recommended schools keep a record of pupils and staff in each group and any close contact that takes place between children and staff in different groups. 				
Contain any outbreak by following local health protection team advice	Staff and children	If schools have 2 or more confirmed cases within 14 days, or an overall rise in sickness absence where coronavirus is suspected, they may have an outbreak, and must continue to work with the local health protection team who will be able to advise if additional action is required. In some cases, health protection teams may recommend that a larger number of other pupils self-isolate at home as a precautionary measure – perhaps the whole site or year group. If schools are implementing controls from this list, addressing the risks they have identified and therefore reducing transmission risks, whole	Low/medium	Staff to be given RA and to sign working conditions. 		Level.				
		In local restriction tier 4 areas, individuals who are				
		clinically extremely vulnerable are advised to work				
		from home and where this is not possible they should				
		go into work. Individuals in this group will have been				
		identified through a letter from the NHS or from their				
		GP and may have been advised to shield in the past,				
		most recently in November 2020.				
		Any staff in Extremely Clinically vulnerable group will				
		work from home.				
		All other staff in local restriction tier 4 can continue to				
		attend work, including those living in a household				
		with someone who is clinically extremely vulnerable.				
		The series with the series of	l .	l .		1

		All staff can continue to attend school in local restriction tiers 1, 2 and 3. Under local restriction tier3, staff and employers may wish to discuss flexibilities that support clinically extremely vulnerable staff, such as staggered start times to reduce travel during rush hour.				
Staff who are clinically vulnerable	Staff	Clinically vulnerable staff can attend school. While in school they should follow the sector-specific measures in this document to minimise the risks of transmission. This includes taking particular care to observe good hand and respiratory hygiene, minimising contact and maintaining social distancing in line with the provisions set out in section 6 of the 'prevention' section of this guidance. This provides that ideally, adults should maintain 2 metre distance from others, and where this is not possible avoid close face to face contact and minimise time spent within 1 metre of others. While the risk of transmission between young children and adults is likely to be low, adults should continue to take care to socially distance from other adults including older children and adolescents. People who live with those who are clinically extremely vulnerable or clinically vulnerable can attend the workplace unless advised otherwise by an individual letter from the NHS or a specialist doctor.	Medium	Staff to be given RA and to sign working conditions.	HT	4/1/21

Staff who are pregnant	Staff	Pregnant women are in the 'clinically vulnerable'	+			
Staff who are pregnant	Staff	Pregnant women are in the 'clinically vulnerable' category and are generally advised to follow the above advice, which applies to all staff in schools. All pregnant women should take particular care to practise frequent thorough hand washing, and cleaning of frequently touched areas in their home or workspace, and follow the measures set out in the system of controls section of this guidance to minimise the risks of transmission. A risk assessment is completed with all staff who are pregnant and support is offered.	Medium	Staff to be given RA and to sign working conditions.	HT	4/1/21
Limiting staff and children on site	Staff and children	We are asking Critical workers to only send children in when they need the provision. We are limiting staff in the building by creating bubbles of staff and only having the required number of staff for the required number of children. All staff and children have been allocated toilets and children are not eating in the hall unless socially distanced. Staff are to remain 2m distance from each other. Staff to wear masks /visors around parents. No parents are allowed inside school. Bubbles are not sharing resources. Bubbles are spaced out around the school to again limit contact.	Medium	Staff to be given RA and to sign working conditions.	НТ	4/1/21
